

# Wilson Sie

@wilson.sie.dev@gmail.com    📞 (65)9727 5272    📍 Singapore  
🐙 Github    in LinkedIn

## SKILLS

Languages - Python, Typescript, Javascript,

Frameworks & Technologies - React, NodeJS, GraphQL, REST APIs, Prisma, PostgreSQL, Rollup, Webpack, Git, Docker, Github Actions,

## EXPERIENCE

Trustana | Software Engineer

June 2022 - Present

Associate Software Engineer

- Played a key role in establishing the company's component library using Storybook that was published as a package via AWS Codeartifact.
- Built and maintained reusable components for the component library to be used across different projects to ensure UI consistency and improve developer efficiency.
- Collaborated with designers and product managers to build dashboards that supported data visualization, data filtering, data exporting and generation.
- Was involved in setting up numerous projects and pipelines that enabled developers to have a better experience in developing and deploying their code.
- Adopted practices such as caching and debouncing of data to reduce load on the server/browser, reducing cost, improving product search times and user experience.
- Wrote numerous APIs and AWS Lambda functions that was orchestrated by a Step function to provide a service that generated product data for customers/vendors. Also worked on improving the flow by leveraging on parallelism in order to reduce the time taken to generate product data.

National Kidney Foundation | Web Developer

Aug 2021 - June-2022

Freelancer

- Worked closely with other designers to design and develop reusable email templates to be used for marketing campaigns.
- Worked on email template formatting with frontend tools such as HTML and CSS and Javascript.

## EDUCATION AND CERTIFICATIONS

- University of London
  - B.S. (Hons) Computing and Information Systems
- Certis Cisco
  - Cisco Certified Network Associate (CCNA)

## PROJECTS

- Code Editor
  - 🐙 [Github](#)
  - Built in a monorepo, this application serves as a browser code sandbox that is able to compile and execute user input code and judge the output performance. It is used as a tool for me to test algorithms while development.

Typescript   TailwindCSS   NodeJS   Prisma   PostgreSQL   Docker   Github Actions
- Design System
  - 🐙 [Github](#)   🔗 [Live link](#)
  - A design system package that provides a set of UI components to reuse across different projects. It is built with React and tested with Storybook. Rollup was used to bundle the package and published to NPM via Github Actions.

Typescript   TailwindCSS   Storybook   Rollup   Github Actions
- Blockchain Signature pad
  - 🐙 [Github](#)
  - Utilising the Truffle framework and web3JS, this app provides an interface for users to sign their signature and store it in a local Ethereum blockchain.

Truffle   Solidity   Javascript   React
- Visual Algo
  - 🐙 [Github](#)   🔗 [Live link](#)
  - An interactive learning tool that visualizes algorithms used in software engineering.

Reactjs   Javascript   CSS3
